The following is a modified examiner's statement of reasons for allowance for claims 12-18. The prior art does not disclose time constant means for initially holding the trigger signal at a first state when a discharge occurs to the first supply line and for driving the trigger signal to a second state after a time delay when the discharge occurs, and feedback means coupled to drive the trigger signal and responsive to the gate signal for driving the trigger signal to the second state when no discharge occurs.
